[Microdata file application form](#)

1. Introduction

The files for the Survey on Living Conditions 2004 (hereafter ECV 2004) for families and individuals are a dissemination product aimed at users with experience in analysing and processing microdata. This format provides added value to the user, allowing him or her to exploit and analyse data which, due to obvious limitations, the current standard dissemination in the form of tables, publications and reports cannot encompass.

This report, to be specific, describes the microdata file corresponding to the family questionnaire. This file contains a selection of the variables collected and generated in the survey on the family context and is structured around the thematic areas covered by the survey for this statistical unit (family relations, social and physical environment, facilities and services of the surroundings, etc.)¹. A microdata file at individual level is also available, containing specific information collected and generated by the survey for this statistical unit. This file is provided separately together with its corresponding description.

2. Criteria for selection of variables

The ECV covers a broad array of variables and characteristics at family and individual level that need to be processed, adjusted and summarised prior to exploitation. The file described here covers a selection of these variables already prepared for treatment. This selection has been carried out based on criteria of both confidentiality and quality of the information which is detailed below:

2.1 Confidentiality criteria

Maintaining statistical secrecy for those supplying information is one of the main guiding principles in statistical activity. Therefore, the dissemination of any individual information collected under the obligation of statistical secrecy should be anonymous and carried out in such a way that none of the identities of the statistical units can be deduced, not even via the content or disaggregation of the published variables.

Therefore, to safeguard this guarantee, the following restrictions have been applied to the family file of the ECV 2004:

- In no event does it include direct identification variables or personal details (ID n^o, name, surname, address, telephone n^o, etc.).
- The maximum geographical disaggregation included is the ZONE (grouping of districts) and provincial capitals.
- The age of the reference person is presented in five-yearly bands given its highly identifiable nature in combination with the other demographic variables.
- Standard groupings of variables which characterise the family, the dwelling or the building and do not allow identification of "singular" units are used (e.g. very large families, isolated buildings, etc.).
- Numerical variables are not included (e.g. hours of outside help, net income, number of household vehicles, etc.), except the family weighting and the family identifier. These variables appear categorised in sufficiently broad ranges or intervals.

¹ For further information consult the questionnaire and documentation related to the survey at www.eustat.es

FAMILIES ECV 2004

- As regards sensitive subject areas covered by the survey, only the most important synthetic indicators have been included once the possibility of identifying registers has been eliminated. Variables of safety in the home, social environment and citizen safety have been eliminated (related directly to physical assaults, delinquency, drug addiction or prostitution), as well as direct references to economic restrictions and their type.

2.1 Quality criteria

Another aspect to pay attention to in the analysis and processing of statistical products is data quality. The quality of the statistical product can be defined using the specific quality factors promoted by EUROSTAT: Relevance, accuracy and reliability, timeliness and punctuality, coherence and comparability, accessibility and clarity.

In this case and for the selection of the variables to be included in the family microdata file of the ECV 2004, we have focused on the first two aspects: relevance (interest of the data for the final user) and the accuracy and reliability of the information.

2.1.1 Relevance

Given the great quantity of variables collected by the survey, we have attempted to synthesise and include those that are supposed to be of the greatest interest and relevance for the general survey user. Thus the following considerations have been made:

- Variables of household or building equipment of negligible analytical interest have not been included, such as small household appliances (food processor, juicer, etc.), specific sports equipment (bats, surfboards, etc.) and audiovisual equipment (radio, Discman, projector, etc.).
- On the other hand, detailed variables of ICT equipment in the household have been included (computers, Internet, etc.), which have been of growing interest for users in recent years.
- Groupings of variables related to services in the immediate surroundings have been made, since great variability has been detected in the estimations between periods. For example, the different types of establishments of foodstuffs (fishmonger, greengrocer, butcher, etc.) are grouped together as one "Establishments of foodstuffs and consumer goods".

2.1.2 Accuracy and reliability

In any sampling survey, the main limitation consists of the fact that information is available solely for the sample units and not for the whole of the target population. The sampling design of the survey will shed light on the level of representativity that we can attain with the information collected.

In the case of the ECV, although the sample of households is selected stratified by ZONE (or grouping of districts), the representativity required is at least Province-level for the main variables and crosses of the survey. However, the great quantity of variables and the high level of detail that can be reached with the variables included in this file do not guarantee the statistical significance of all the exploitations or analyses that can be carried out on this data.

The conclusions reached from the studies or analyses carried out on the data are the responsibility of the final user. However, to get an idea of the quality of the information for a specific cross or disaggregation the user is recommended to consult the tables of sampling errors of the survey:

(http://www.eustat.es/document/datos/Errores_ECV2004_web_c.xls)

and the corresponding report on the calculation of sampling errors:
(http://www.eustat.es/document/datos/Calculo_errores_ECV04_c.pdf)

which feature recommendations on the acceptable levels of sampling error.

3. Register design

The family microdata file for the ECV 2004 is in text format, with fixed columns and structured around the subject areas covered by the survey for this statistical unit. The description of the variables, the type, the possible states and the exact positions in the file are described in the Excel file *Estructura_familias_ECV04.xls* which is attached together with all the documentation related to the microdata file ECV 2004.

4. Synthetic indicators

Some of the variables included in this microdata file do not correspond exactly with questions from the family questionnaire, but rather are synthetic variables deriving from the exploitation of various items or questions from this questionnaire. These variables are known as "Synthetic Variables" and their generation and relation with the other variables is described in the Excel file *Estructura_familias_ECV04.xls* which is attached together with all the documentation related to the microdata file ECV 2004.

5. Description of variables

Includes the literal descriptions corresponding to the coding of each of the variables included in the file. See Annex I.

6. Help for reading file

Includes SAS programming for direct reading of the microdata file. See Annex II.

ANNEX I

DESCRIPTION OF THE FILE ECV04_FAMILIAS.DAT

1 Household Identifier

CV1_IDEV

2 Province of residence

CV1_TERR

01 Araba
20 Gipuzkoa
48 Bizkaia

3 Zone of residence

CV1_ZOCV

1 Llanada alavesa
2 Rest of Alava
3 Gran Bilbao
4 Duranguesado
5 Gernika-Bermeo+Plentzia-Mungia+Markina-Ondarroa
6 Arratia-Nerv+Encartaciones
7 Donostialdea+Bajo Bidaso
8 Alto Deba+Bajo Deba+Urola Costa
9 Tolosaldea+Goierri

4 Municipality of residence

CV1_MUNI

020 Bilbao
059 Vitoria-Gasteiz
069 Donostia-San Sebastián
000 Other municipalities

5 Sex

CV1_SEXOF

1 male
2 female

6 Age

CV1_EDADFR

01 4 or under
02 from 5 to 9
03 from 10 to 14
04 from 15 to 19
05 from 20 to 24
06 from 25 to 29
07 from 30 to 34
08 from 35 to 39
09 from 40 to 44
10 from 45 to 49
11 from 50 to 54
12 from 55 to 59
13 from 60 to 64
14 from 65 to 69
15 from 70 to 74
16 from 75 to 79
17 from 80 to 84
18 85 or over

7 Marital status

CV1_ECIV

- 1 single
- 2 married
- 3 widowed
- 4 divorced/annulled
- 5 legally separated

8 Sedentary

CV1_SEDE

- 1 yes
- 2 no

9 Nationality

CV1_NACI

- 1 Spanish
- 2 Spanish and others
- 3 foreign

10 Place of birth

CV1_LNACF

- 1 Araba
- 2 Bizkaia
- 3 Gipuzkoa
- 4 rest Spain
- 5 rest of world

11 Place of origin

- 1 Araba
- 2 Bizkaia
- 3 Gipuzkoa
- 4 rest Spain
- 5 rest of world

12 Level of education

CV1_NIV11

- 1 no studies
- 2 primary (EGB)
- 3 middle (Vocational Training, Baccalaureate)
- 4 higher

13 Relation with activity

CV1_REL1

- 1 employed
- 2 unemployed
- 3 inactive

14 Have you ever worked?

CV1_TRAB1

- 1 yes, I have worked
- 2 no, I have never worked

15 Professional code

CV1_CPROF1R

- 1 Company management and Public administration
- 2 Technician and professional, scientific and intellectual
- 3 Support Technician and professional
- 4 Clerical employee (includes Armed Forces)
- 5 Personal services, catering, protection and trade
- 6 Skilled worker, agriculture and fishing
- 7 Skilled worker, industry, construction and mining
- 8 Machine operators, fitters
- 9 Non-skilled workers

16 Professional status

CV1_SPRO1

- 1 entrepreneur with paid employees
- 2 self-employed
- 3 family help
- 4 co-operative worker
- 5 permanent paid worker
- 6 temporary paid worker
- 7 other situations

17 Relationships with family (existence)

CV1_REFA

- 1 has no family
- 2 has family, no relationship
- 3 has relationship

18 Telephone contact with family members

CV1_TEFA

- 1 every day
- 2 once or more per week
- 3 once or more per month
- 4 once or more per year
- 5 never

19 Letter writing with family members

CV1_CAFA

- 1 every day
- 2 once or more per week
- 3 once or more per month
- 4 once or more per year
- 5 never

20 Visits to family members

CV1_VIFA1

- 1 every day
- 2 once or more per week
- 3 once or more per month
- 4 once or more per year
- 5 never

21 Visits from family members

CV1_VIFA2

- 1 every day
- 2 once or more per week
- 3 once or more per month
- 4 once or more per year
- 5 never

22 Lunches, dinners, etc. with family members

CV1_COFA

- 1 every day
- 2 once or more per week
- 3 once or more per month
- 4 once or more per year
- 5 never

23 Help to family members

CV1_AYFA

- 1 every day
